- **OBJECTIVE:** This project is built to save electric current, we find the best solution for it, is using the sensors.

MAJOR PROJECT:

- **TITLE:** Conversion of sign language to text
- **TEAM SIZE:** 5
- **MY ROLE:** Team Leader
- **OBJECTIVE:** People affected by speech impairment can't communicate using hearing and speech, they rely on sign language for communication. Our idea is to produce a system that will enable interactions. Sign communication describes the use of your hands to produce shapes or motions by their connection to the head or other physical aspects, along with distinct facial features. As a reason, a classification system must be capable of detecting various hand orientations or gestures, and even hand position.
